

# Hering Puts the Power to the Water Again in 2005!

**H**ering's revolutionary 5 and 6 blade technology dominates the world of Offshore racing with national and world titles in Factory 2, Super Vee Light, Super Vee, Super Cat Light, Super Cat, Superboat and UIM Class 1. Hering also propels the worlds fastest Vee Bottom (177 mph) and Catamaran (202 mph). When only the best will do, insist on Hering.

There's no "black magic" in our propellers! Unlike our competitors, HERING uses only the latest in CNC manufacturing technology to make every propeller we sell, resulting in exacting tolerances and a superior performing propeller for your single or multi-engine application.

Hering's 6 blade technology raises the bar once again! Developed on the toughest race circuits by the world's best teams, Hering propellers offer superior performance over the competition. Often imitated, NEVER duplicated, let Hering custom build your next propeller for your performance sport boat or yacht.
